Rev. No.	1		
Date	01-12-2020	WASTE MANAGEMENT AND ENVIRONMENTAL CONSIDERATION	
Pages	2		

1 Objective:

- Demonstrate the company's commitment to the protection of environment and preservation of natural resources in all its activities.
- Drive continuous minimization of waste generation and improvement in waste management to achieve the best HSE outcome.

2 Scope:

- Compliance with Iraq environment law and instructions of the government.
- Compliance with client recommendation on environmental issues and waste management.
- Commitment to protecting the work environment aspects including but not limited to -
 - ❖ Air pollution
 - ❖ Waste control
 - ❖ Wastes
 - ❖ Noise

3 Process Description:

Environmental Awareness:

In simple terms, consider savings in power and electricity consumption as well as other environmental aspects, example:

- Switch off power when not required.
- Switch off A/C when not required.
- Do not switch on the lights in rooms and work area when there is sufficient lighting is available.
- Do not use water more than needed when taking shower, shaving, cleaning, etc.
- Re-cycle sewage water for use in irrigation and improve quality of water for use in washing and firefighting.
- Plan for and reduce number of transportation trips to reduce fuel consumption and air pollution.
- Good housekeeping and maintaining and a tidy area contribute to clean environment.
- Communicate the above examples to the company employees.
- Promote environment awareness through campaign, posters and discussion in the monthly HSE meeting with employees.

Sewage:

The sewage facility should be designed in accordance with regulatory guidelines. Sewage water to be treated and used for irrigation and landscaping purpose. There should be:

- No soak away.
- No water to desert.
- Water treatment and re cycling provided.
- Cleaning program for solid waste.
- Sewage capacity to cater for twice population in the camp.
- Close monitoring of system.
- Periodical inspection carried out.

Waste Management:

Most of the company waste is classified as solid waste. The types of waste estimated quantity and way of disposal are recorded in the format. The records are maintained for client and internal audit purpose.

Refuse Segregation, Storage & Disposal:

- Wherever possible waste shall be segregated in to cycleable, non cycleable, burnable, non-burnable such as glass, plastics, metal etc.
- Prior to removal from premises all refuse shall be stored in a manner that makes it inaccessible to insects and rodents.
- Refuse storage rooms shall be constructed to easily cleanable, non-absorbent materials and be insect and rodent proof.
- A facility shall be provided for cleaning refuse containers after they are emptied.
- Refuse shall be kept in durable insect and rodent proof containers that do not leak and be provided with tight fitting covers.
- Refuse shall be disposed of often enough to prevent the development of odor and attraction of rodents and insects.
- Where waste refuse is burned on the premises, it shall be done by controlled incineration.
- It is strictly prohibited to dispose of refuse into an own area. It shall be taken to an approved disposal area.

4 Responsibility:

HSE Supervisor and Location Manager shall implement this at site level.
